

Pro-Line Metal Fab, LLC Nixa, MO | Marine & Powersports OEM Specialist

1. COMPANY OVERVIEW

Pro-Line Metal Fab is a systems-driven fabrication partner located in the heart of the Midwest's marine manufacturing hub. We specialize in high-aesthetic, structural components for the Marine (Pontoon/Fiberglass) and Powersports (ATV/UTV) industries. Founded on the principles of process discipline and repeatable quality, we bridge the gap between complex design engineering and line-ready production.

2. CORE COMPETENCIES

High-Aesthetic Marine Welding: Specialized TIG and Pulse-MIG welding for 316L Stainless Steel and Aluminum (5052/6061).

Precision Tube Bending: Mandrel-bending capabilities for console rails, ski tows, and handles with zero-deformity throats.

Sub-Assembly & Kitting: We deliver "Line-Ready" kits, reducing OEM inventory touches and assembly time.

Design for Manufacturing (DFM): In-house engineering utilizing Autodesk Inventor to optimize part geometry for cost and durability.

Quality Assurance: Tier-1 compliant documentation including MTR tracking, FAI (First Article Inspection), and NCR protocols.

3. FACILITIES & CAPACITY (The "Lean" Model)

Strategic Sourcing: We utilize a vetted, local network for high-capacity Fiber Laser and CNC Machining, ensuring redundant capacity and zero-downtime for our clients.

In-House Fabrication: Dedicated stations for precision welding, finishing, and structural assembly.

Logistics Advantage: Based in the Nixa/Springfield, MO area, providing JIT (Just-In-Time) delivery to major regional boat and powersports assembly plants.

4. DIFFERENTIATORS

The "Pro-Line" Standard: Every part is built to a documented Standard Work Instruction (SWI), ensuring the 1,000th part is identical to the 1st.

Material Integrity: Strict segregation of stainless and aluminum to prevent carbon contamination and galvanic corrosion.

OEM Fluency: Our leadership understands the specific load-bearing and salt-spray requirements of the ABYC and NMMA standards.

5. KEY DATA

Entity: LLC (Missouri)

Focus Industries: Marine, ATV/UTV, Industrial B2B

Software: Autodesk Inventor (Full CAD/CAM integration)

Location: Nixa, MO
